

seereference.com Funding Model

1. Funding Stage

Current Stage:

Prototype and foundation development phase.

Funding Objective:

Secure seed investment to accelerate product development, AI infrastructure, market validation, and commercial launch.

2. Initial Funding Requirement

Target Seed Funding:

AUD \$350,000 – \$500,000

Purpose:

To transform the current prototype into a scalable AI-assisted engineering ecosystem.

3. Use of Funds

Category	Estimated Allocation
Software development	\$150,000
AI infrastructure and computing	\$50,000
Cloud services and hosting	\$30,000
Security and compliance	\$40,000
Product design and user experience	\$40,000
Marketing and customer development	\$50,000
Operations and administration	\$40,000

4. Revenue Strategy

Subscription Revenue

Individual Users

Target: Researchers, engineers, professionals

Expected pricing:

\$10–30/month

Professional Users

Target:

Engineering teams and knowledge workers

Expected pricing:

\$50–100/month

Enterprise Customers

Target:

Companies and institutions

Expected pricing:

Custom contracts

5. Three-Year Growth Model

Year 1 — Foundation

Goals:

- Complete MVP
- Validate product-market fit
- Acquire initial users

Target:

1,000 registered users

Year 2 — Commercial Growth

Goals:

- Launch subscription services
- Build partnerships
- Expand platform capabilities

Target:

Year 3 — Scale

Goals:

- Enterprise adoption
- International expansion
- Advanced AI services

Target:

50,000+ users

6. Key Financial Metrics

Track:

- User acquisition cost
 - Monthly recurring revenue
 - Customer retention
 - Infrastructure cost
 - Conversion rate
-

7. Investment Return Opportunity

Investment enables:

- Faster product development
 - Market entry
 - AI capability expansion
 - Commercial scaling
-
