

seereference.com Investor Pitch Deck

Slide 1 — Vision

seereference.com

AI-Assisted Engineering Ecosystem

Building intelligent digital reference systems and knowledge platforms that connect artificial intelligence, engineering, and human expertise.

Slide 2 — The Problem

Today's digital environment creates challenges:

- Knowledge is fragmented across many platforms
 - Important information is difficult to discover
 - Research and documentation require significant manual effort
 - Existing AI tools are often disconnected from personal and engineering workflows
-

Slide 3 — The Opportunity

The growth of artificial intelligence creates a major opportunity to build:

- Personal AI knowledge systems
 - Intelligent engineering assistants
 - Automated research platforms
 - Digital innovation ecosystems
-

Slide 4 — Our Solution

seereference.com provides an AI-assisted ecosystem for:

- Knowledge organisation
 - Digital reference management
 - Intelligent search
 - Engineering workflows
 - Technology innovation
-

Slide 5 — Product Vision

Core platform capabilities:

Knowledge Intelligence

- Organise information
- Connect related knowledge
- Improve discovery

Engineering Assistance

- Support research
 - Automate workflows
 - Accelerate development
-

Slide 6 — Technology Strategy

Technology foundation:

- Modern web platform
- AI-assisted systems
- Automation frameworks
- Cloud-ready architecture

Future expansion:

- AI agents
 - APIs
 - Enterprise integrations
-

Slide 7 — Market Opportunity

Target markets:

Individual Users

- Researchers
- Engineers
- Students
- Professionals

Organisations

- Technology companies
- Engineering teams
- Research institutions
- Businesses

Slide 8 — Business Model

Potential revenue streams:

Subscription Services

Individual: \$10–30/month

Professional: \$50–100/month

Enterprise: Custom pricing

Additional:

- API access
 - Custom solutions
 - Consulting services
-

Slide 9 — Competitive Advantage

seereference.com focuses on:

- Personalised knowledge systems
 - Engineering-oriented AI solutions
 - Integration between information and action
 - Long-term knowledge ownership
-

Slide 10 — Development Roadmap

Phase 1

Foundation and MVP

Phase 2

Commercial platform

Phase 3

Enterprise ecosystem

Slide 11 — Funding Requirement

Initial funding supports:

- Product development
- AI infrastructure
- Cloud services
- Security
- Marketing
- Partnerships

Estimated seed requirement:

\$350,000–\$500,000 AUD

Slide 12 — Investment Opportunity

seereference.com aims to build a scalable AI knowledge and engineering ecosystem.

Investment will accelerate:

- Product development
 - Market entry
 - Technology innovation
 - User growth
-
